Hoosier Governor At Camp

8th Division's Indiana Guardsmen Midst Of 1954 Field Training

CAMP GRAYLING, Mich. — Troops of Indiana's all-star 8th Infantry Division are in the middle of their 15-day summer training period here today. National Guardsmen, who arrived here Sunday, are encamped in this large, heavily wooded military reservation on the shores of Lake Michigan.

Training on a daily eight-hour basis, begins at 7:30 a. m. and ends at 6 p. m. A maximum of 1954 training is under simulated combat conditions. Special stress is laid on small unit training, development of leadership and efficiency at all levels of command.

Weapons firing and training — on rifles up to the division's 81 mm howitzers and tank weapons — began this week. Also underway is special intelligence, signal, and automotive training.

A full scale program of religious services for all faiths began immediately, under the direction of Lt. Col. Frederick Westendorf, Fort Wayne, division chaplain. A recreational program, including baseball, boxing, other sports and movies is planned by Capt. William Upton, Indianapolis, division athletic and recreation officer.

The training program for the divisional engineers, the 13th Engineer Battalion with units in Gary and Whiting, includes work in land mine warfare, building of bridges, rafts and floating bridges, and a tactical exercise in support of a regiment in the attack.

In off-duty hours here, Hoosier Guardsmen have been enjoying the swimming and fishing facilities afforded by Lake Michigan.

Training highlights will include: Special chemical, biological and radiological instructions; extensive small arms, mortar and artillery firing; Signal, intelligence, and motor maintenance training; Ammunition training and tank firing.

Only one unit — the 13th Anti-Aircraft Battalion — will not train at Camp Grayling. It will go to Camp Clay, Mich., where AA range facilities are available.

The annual division review, with Governor George H. Craig, state officials, the employees of Guardsmen and others as guests, will be July 24. Some of the guests will be flown to Grayling by planes of the Indiana National Guard.

Major units which will participate in training include: Headquarters, 8th Division; Headquarters, 38th Infantry; 1st, 2nd, 3rd, 4th, 5th, 6th, 7th, 8th, 9th, 10th, 11th, 12th, 13th, 14th, 15th, 16th, 17th, 18th, 19th, 20th, 21st, 22nd, 23rd, 24th, 25th, 26th, 27th, 28th, 29th, 30th, 31st, 32nd, 33rd, 34th, 35th, 36th, 37th, 38th, 39th, 40th, 41st, 42nd, 43rd, 44th, 45th, 46th, 47th, 48th, 49th, 50th, 51st, 52nd, 53rd, 54th, 55th, 56th, 57th, 58th, 59th, 60th, 61st, 62nd, 63rd, 64th, 65th, 66th, 67th, 68th, 69th, 70th, 71st, 72nd, 73rd, 74th, 75th, 76th, 77th, 78th, 79th, 80th, 81st, 82nd, 83rd, 84th, 85th, 86th, 87th, 88th, 89th, 90th, 91st, 92nd, 93rd, 94th, 95th, 96th, 97th, 98th, 99th, 100th.

These deer may not be aware of it, but they are helping their wild cousins in the long fight for race survival. The animals are being used in continuing studies of deer food problems at Houghton Lake wildlife experiment station. Biologist Jerry Duveneck, a Michigan State College student doing research for the state conservation department, walks among his charges in one of the station's feeding pens.

Emergency March Of Dimes Slated

An emergency "March-of-the-Dimes" campaign will be conducted in Crawford County and throughout the nation beginning August 18th with a goal of \$20,000,000 to finance this summer's patient care.

The 1954 incidence of Polio in Michigan has already exceeded 1953, a record year, which points to the fact that funds will urgently be needed for this summer. The shortage has been caused by the expenditure of \$28,600.00 for Gamma Globulin and for the "Salk" vaccine tests, both of which are believed to have kept the disease from striking more severely than in past years.

During the regular January March of Dimes this year Crawford County ranked second in Michigan and second in the Midwest in per capita contributions. In spite of this record, it is felt that Crawford will again do its share and more to aid a cause familiar.

A chairman for the drive has not been announced by the chapter chairman, John H. Peterson, but everyone is asked to keep in mind the August 18th drive date and be prepared to assist.

Three Grayling men were assessed fines by Justice of the Peace Arthur Clough on Monday after the trio had entered guilty pleas. The three men were arrested Sunday afternoon by Sheriff John A. Papendick and City police officer Arthur Clough Jr. after their car was in a minor collision at the intersection of North and Lake Streets.

The driver, John Wakeley of Grayling was given a \$50 fine and court costs or 30 days in jail after pleading guilty to a drunk driving charge. The two men who accompanied him both pleaded guilty to drunk and disorderly conduct. Wakeley was fined \$10 and costs or face a 10 day jail sentence while Frank Moore was given court costs only or face a 5 day jail sentence.

Mercy Hospital Construction To Begin In The Spring

Meet Tonight To Attempt Chamber Re-birth

Because of the delay in submitting the announcement of the meeting at the Airport, many people who are interested in reviving our Chamber of Commerce were unaware of the meeting. Only four people attended. However, a meeting of everyone interested is scheduled to be held at the Court-house, Thursday evening, July 22nd at 8:00 p. m.

The four persons present were: J. W. Witte, Devere Benware, "Bill" Sorenson and Clayton McDonnell. Each of those present agreed to contact as many as possible and urge them to attend the meeting July 22nd. At this meeting it is hoped to have present all of the former members and officers of the organization in addition to newcomers to the community who are interested in cooperative effort to better our community.

Subject to approval of those present at this meeting the following agenda will be submitted:

1. Select temporary chairman for meeting. (who will appoint secretary).

2. Discussion of reasons for and causes of the suspension of Chamber activities. (limited to 1 hour)

3. Discussion of benefits derived from having an active Chamber of Commerce. (limited to 1/2 hour)

4. Nominate and elect Temporary President and Secretary to hold office until permanent officers are elected and installed.

5. Temporary President will be to convey to the officers and enlisted men of the 38th Div., the hospitality of our community and to express our desire that they continue to utilize Camp Grayling for summer training.

6. His second duty will be to contact our District Representative and Senator as well as the Chairmen of the Military Affairs committees in the State Senate and House of Representatives and inform them of our interest in having Camp Grayling used to the fullest extent throughout the summer by outstate and Michigan National Guard units; that the economic importance of the Outstate Guard Units to this entire resort area should be considered in planning out of the use of Camp Grayling.

7. His third duty will be to appoint a committee of three, one of which must be a general member not engaged in any business or profession, and work with them to develop and present to the membership at the earliest date possible proposed changes in By-laws, dues, and any other matters pertaining to establishing a more workable Chamber of Commerce.

8. Present outstate guest.

9. Adjourn.

Grayling Leads All-Star Squad

Grayling, currently on the bottom of the standings, placed three players on the All-Star team to lead all other clubs at a selection made by Chain-of-Lakes League managers at a meeting last Monday evening at the home of Mrs. Gertrude Barber, league secretary in Rapid City.

Pleasant Valley was next with two, and Bellaire, South Torch Lake and Kalkaska each placed one.

The All-Stars play the Consumers Power, last year's champs, at the Alden diamond on the night of July 25.

The All-Star team follows:
 Catcher, Buck Burns, Bellaire.
 First Base, Joe Gibbard, Pleasant Valley.

Second Base, John Hebben, Pleasant Valley.
 Third Base, Walter Merrill, South Torch Lake.

Center Field, Bob Gildner, Grayling.
 Left Field, Norm Karsten, Grayling.

Right Field, Bob Horning, Grayling.
 Short Stop, Bernard Whipple, Kalkaska.

Dorr Mason, of Bellaire, who was named manager, picked Johnny Holstad, of South Torch Lake; Skeeter Rinckey, Bellaire; and Bob Youngdyke of Bellaire as his hurlers. Ray Leach of Kalkaska was elected coach.

Mason also picked the following as substitutes: H. Wilson, Pleasant Valley; Elvin Ritt, Bellaire; Barney Barber, South Torch Lake; K. Guy, South Torch Lake; Rod Patrick, Bellaire; H. Nosthine, South Torch Lake; K. Rosenberg, Kalkaska; Don Smith, Bellaire; and Andy Patrick, Bellaire.

4-Hers ATTEND CONSERVATION CAMP

Two 4-H Club members from Crawford County attended Conservation Camp at Camp Shaw in the Upper Peninsula last week along with approximately 150 boys and girls from every county in the state.

The Club members who were chosen to go on the basis of outstanding 4-H project work in Conservation were Rebecca Sworthwood and Lewis Johnson of Lovells. They left Monday, July 12 in the Grand Traverse County 4-H Club bus, with thirty other 4-H Club members from other Northern Michigan counties, and returned on Saturday, July 17. Andrew Olson, Grand Traverse County 4-H Club Agent was in charge of the delegation.

The week-long program was made up of daily bus tours to surrounding areas, conservation lectures and classes on wildlife, bird study, insect work, forest management, and forest fire study, recreation, swimming, and movies.

The trip is sponsored by the Firestone Rubber Company, Federal Cartridge Company and Michigan Bell Telephone Company.

Camp Shaw is located at Chatham, where Michigan State College also maintains the Upper Peninsula Agricultural Experiment Station.

Some Real Progress . . .

For some reason, the idea has been gaining wide currency that the Eisenhower legislative program has encountered extremely thorny going, and that only a relatively small part of it has any chance of becoming law. There seems to be more talk about the setbacks than about the accomplishments.

It was obvious from the beginning that no program so all-embracing as that laid down by the President at the start of his administration would be approved in its entirety. Some of the President's friends and followers are of the opinion that he made a mistake in asking so much. But, whether that is true or not, an objective look at the record shows many very important accomplishments.

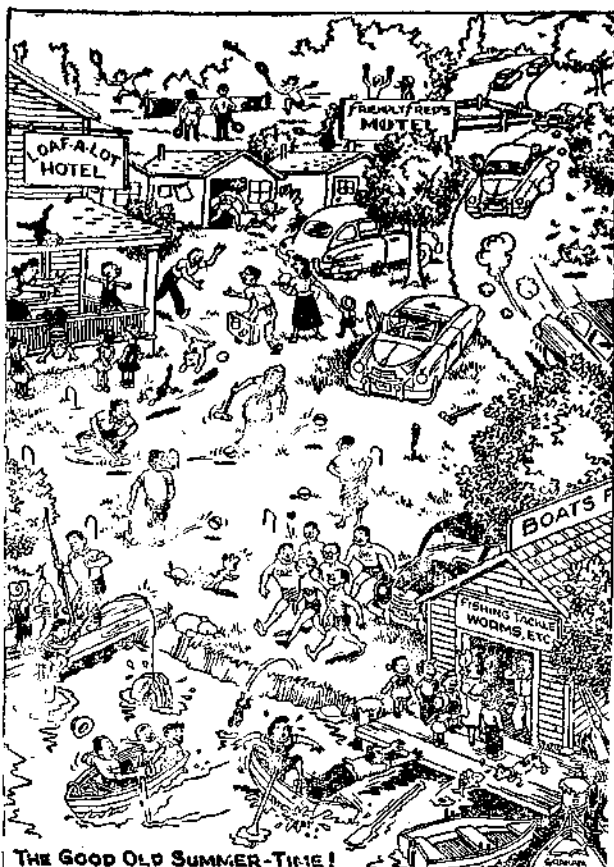

Jay Hayden, a nationally syndicated columnist, recently discussed what has happened. "Eisenhower is approaching the end of his first full fiscal year in a remarkably strong position. It is not too much to say that Eisenhower's accomplishment in the field of economics adds up to as revolutionary a swing toward industrial freedom and stability as Roosevelt's initial New Deal did in the opposite direction of socialistic government controls."

Mr. Hayden went on to describe a number of the major achievements. Some are highly controversial, of course, and many people will disagree with their wisdom. Regardless of that, the President wanted them and got them. Here is a partial list:

The Administration wiped out all price and wage controls. And it did this, as Mr. Hayden observes, "with no sign of inflation, wholesale strikes or other disturbances that were prophesied as resulting from that action."

Government military buying for military purposes has been reduced by \$7,500,000,000 in a single fiscal year. Yet employment has been running at higher levels recently than was the case a year ago. In May, the number of employed reached a peacetime record.

IN HOMETOWN AMERICA

THE GOOD OLD SUMMER-TIME!

Substantial reductions have been made in taxes, from which all individuals and enterprises will benefit in one way or another. Even so, the deficit will be two-thirds less than the Truman estimate.

Though the Senate and House agricultural committees voted down the Eisenhower flexible support proposals, and voted continuance of 90 per cent supports, a surprising number of Senators from farm states—including Iowa, Kansas, Idaho, Florida and New Mexico—supported the President. Here Mr. Hayden observes, "The avowed purpose of President Eisenhower to cut back farm price supports, hailed earlier as his greatest political danger, shows signs of becoming an election-day asset."

Other Eisenhower requests which have been approved include the St. Lawrence Seaway, which had been advocated by every President beginning with Harding without success; increased social security benefits; a national defense bill differing in a number of important respects from prior ones, and extension for a year of the reciprocal trade plan.

That is the record of a stormy and eventful year. Few Presidents have obtained so much they wanted in so short a period.

It's a Million Dollar Ride—and no foolin'

YOU can see for yourself the gay and gorgeous styling that's sure to be the fresh note next year, too.

And you can easily learn that here is power a-plenty—the highest V8 power, Series for Series, in the annals of Buick history.

But what you can never know, till you try it yourself, is the feel of a Buick in motion.

It's a ride as precision-soft and firm as only coiled steel can make it.

Yes, coil springs on all four wheels. And a full-length torque-tube drive for true tracking. And a massive X-braced frame for solid steadiness. And specially calibrated shock absorbers, V-braced struts,

wide-rim wheels, a unique front-end geometry—plus a host of other betterments too numerous to mention.

You feel the result of this advanced engineering every mile you drive—in what is literally and figuratively a Million Dollar Ride.

You feel it in the superb and buoyant cradling. You feel it in the serene levelness of your going over ruts and ridges. You feel it in the precise snubbing of jars and jounces. You feel it in a new kind of steadiness, handling ease, curve control.

Only thing for you to do, we believe, is to come try this miracle of motion—and we'll be glad to oblige.

That way you'll also learn firsthand about

the style, the power, and the value that have made Buick such a best-selling success this year. For Buick today is out-selling all other cars in America except two of the so-called "low-price three."

(Smart tip: With Buick such a beautiful buy this year, think what a winner it's bound to be at trade-in time! Come see us this week!)

PLAN FOUR MILE SWIM AT PETOSKEY

Plans are being laid for a Harbor Springs to Petoskey Swimming Race over a four mile course crossing Little Traverse Bay, during the Water Wonderland Festival to be held in Petoskey, Michigan from July through August 1st.

This race is scheduled for Sunday, August 1st, and any swimmer over 16 years of age is eligible, providing swimmers aged 16 and 17 first complete the race from Bay View to Petoskey, 18 year olds and over may compete without entering the Bay View to Petoskey Race which will be held Thursday, July 25.

All entries, both male and female must have their own seconds and provide towboat escorts, these

may be equipped with outboard motors but as a safety precaution, cannot be run except in emergency. The Festival Committee will provide large boat escorts, who will constantly patrol the course during the races.

Interest in the race is great and 10 persons to date have indicated they will participate, many of these entries are swimming instructors, youth camp counselors and individuals who feel sure they can make the swim through the cold waters of Little Traverse Bay.

Trophies will be awarded winners, and medals will be given the first ten swimmers completing the Harbor Springs to Petoskey course. The first five swimmers completing the Bay View-Petoskey Swim will receive medals with first place getting a large trophy.

SMALL BUSINESS

of actions distributive industry. The Committee states "Anti-trust programs for small businessmen in the past have shown a marked tendency to concentrate on the problem of the manufacturing community. Distributive trades have problems as numerous, just as complex as those of the manufacturing community. They should receive the day-to-day attention of those charged with responsibility of protecting rights and increasing opportunities of all small businessmen."

The report also points out the importance of the distributive business to the American economy. . . . over 24% of all employment is provided by this industry; mostly by small firms.

The report further covers the need for enforcement of antitrust laws and fair trade laws. The committee also charges Justice Department and Federal Trade Commission with dragging their heels in enforcing these laws.

But this is noteworthy. There are no flamboyant personalities charged that so and so is being paid off secretly by such and such corporation.

Instead from language indicates unless suitable action is forthcoming, the committee will take steps, based on well documented facts. No threats of character assassination, just facts.

Therefore, it is hoped in Washington that due to current unfavorable incident public will no longer for curtailment of Congressional investigative powers but rather for Congress to "take over" even more control.

Twenty years ago Congress permitted its tariff making power to be taken away from it with the result that today an estimated 300,000 American workers are laded by huge imports of cheap foreign products.

SCIENCE and your Health

TREATING SERIOUS BURNS

By Science Features
When investigators checked the causes of death in mass fire disasters ten years ago they found that very few people with severe burns survived. Today, after major research projects have developed new medical approaches to the problem, 75 per cent of those suffering from serious second- and third-degree burns do live.

Of the new treatments now being practiced, replacement of fluids and other essential elements lost by the body is very important. Plasma or whole blood and salt solutions—often 12 to 20 pints—are administered during the first 24 hours of care, the amount depending on the extent of the injury and the size of the patient. Vitamins are lost when the body secretes fluids and interference in absorption takes place. Doctors remedy this by supplying concentrated vitamin compounds such as ASP, the anti-stress formula designed for emergencies.

The bandages and heavy ointments once administered to burned areas have given way to the new "exposure" treatment. This method relies only on natural fluid that the body exudes to cover the wound. To prevent infection of the uncovered burn—infection is still the major cause of death in extensive burns—antibiotics such as penicillin and terramycin are given in large doses.

Medical advances have also done more than save burn victims' lives. New developments in skin grafting and plastic surgery remove most of the physical traces of the injury to help return the patient to a normal life.

with this inexpensive, new
Ironrite
AUTOMATIC IRONER

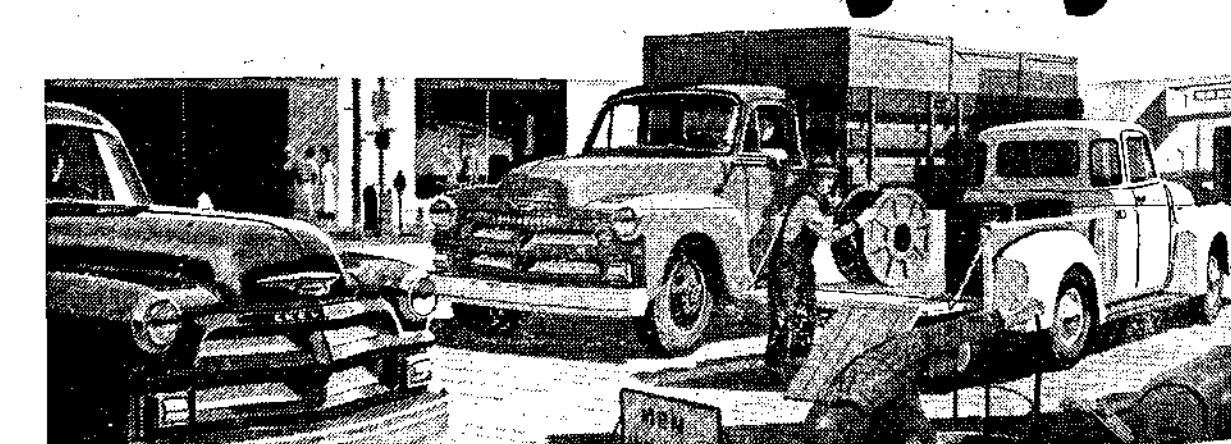

IT'S ALSO TRUE... THAT, REGARDLESS OF WHERE THE CAPITAL IS, WE WANT YOU TO MAKE THIS YOUR HEADQUARTERS... AND WE WILL PROVE IT!
The City of Washington, D. C. is not the capital of the U. S. The location and acceptance by Congress of a District for the permanent seat of government by the United States is provided for in Section 8, Paragraph 17, Article I of the Constitution. Until Congress repudiates or modifies this express provision of the Constitution, the legal capital of the U. S. is the District of Columbia, not the City of Washington. President Adams, in his address to the Senate and House of Representatives, refers to the District of Columbia as the "Capital of a great nation." Congress in reply reiterates that the District of Columbia is the Capital of America.

New Chevrolet Trucks... do more work per day... more work per dollar!

You save on operating costs. The "Thriftmaster 235" engine, the "Loadmaster 235," and the "Jobmaster 261" (optional on 2-ton models at extra cost), deliver greater horsepower plus increased operating economy.
You save extra trips. That's because of extra-load space. New pickup bodies are deeper... new stake and platform bodies are wider and longer.
You save time on deliveries. New truck Hydra-Matic transmission saves time and effort at every stop. Optional at extra cost on 1/2-, 3/4- and 1-ton models.
You save with lower upkeep, too. There are heavier axle shafts in two-ton models, bigger clutches in light- and heavy-duty models, stronger frames in all models.
You save hours on the road. Thanks to new high-compression engine power, you can maintain faster schedules without driving at higher maximum road speeds.
And your savings start the day you buy. Chevrolet, you know, is America's lowest-priced line of trucks.
Come in and see all the wonderful new things you get in America's number one truck.

Air Force 'Thunderbirds' to Be at Air Show

The USAF "Thunderbirds" displaying their precision as they will perform the air acrobatic maneuvers at the Seventh Aviation Exposition and Air Show, sponsored by the Aero Club of Michigan at the Detroit-Wayne Major Airport on Saturday and Sunday, July 24 and 25. They are shown flying in a tight diamond formation displaying the degree of skill being achieved in Air Force flying training schools.

The "Thunderbirds" provide the most exciting and spectacular jet aerobatic performance by four of the outstanding pilots of the Air Force who have between them more than 400 Korean missions in jet aircraft. They will offer a fast-paced 15 minute exhibition with planes just feet apart at more than 500 miles an hour on both afternoons of the Air Show.

DEER INVADE FARMLANDS

Despite efforts to control the Michigan deer herd by the adoption of special seasons permitting the shooting of antlerless animals, something's gone wrong with our planning. Hungry deer in Alpena and Alcona counties are moving out of their browsed-out forest habitat and into the surrounding farms now turning green with budding cherry trees and fresh sprouts of tender leaves on the strawberry plants.

Damage Extensive

As you may have learned in recent news releases from this area, the farmers are up in arms over the situation. The deer damage is costly — running into a loss of thousands of dollars to a single farmer in some instances. The Conservation Department has issued permits to the farmers to shoot the trespassing animals. Heavy rifle fire echoes across that part of Michigan every night now, as an effort is made to save the berry and cherry crops from further destruction.

The average Michigan citizen may well be somewhat confused by the situation. Who is at fault in the failure to keep the deer under better control in this area? The blame goes 'round and 'round!

Clubs Accused

Most of the land surrounding the

crop-damage farm sectors is owned by hunting clubs. Some of the individual clubs control more than 20,000 acres. In some instances, despite open seasons on antlerless deer on a statewide basis, the membership has voted down the killing of anything but bucks with good horns. Naturally, with only a few deer shot in huge tracts of land the herd has grown rapidly, over-browsed much of their natural food, and in hungry desperation moved to the fertile farm lands adjoining.

Feeding Urged

The clubs have been urging the Conservation Department to adopt a widespread feeding program. But this is definitely against department policy.

Meanwhile the farmers are caught in the middle. A half-million dollar berry crop is periled. Fencing — and the fences have to be at least 8 feet high — is economically impractical. Trapping deer is next to impossible. And so the killing by permit must continue, though its effect on the vast numbers in the herd will be negligible. A three-way get-together and possible compromise is now being attempted involving the Department, club representatives and the farmers. The whole thing is a problem that makes deserving headlines in Michigan Outdoors right now.

Camp Lehman Given Jet Plane Model

The Camp Lehman Ground Observer Post was presented with a model of the North American F-86 jet July 15th in recognition of its outstanding contribution to the National Defense effort.

The presentation was made by M/Sgt. Morrissey from the Grand Rapids Air Defense Filter Center. M/Sgt. Morrissey praised the volunteers of the Camp Lehman post for their patriotic and self-sacrificing efforts in behalf of the Air Defense of the United States. The Camp Lehman Post is one of 19,000 throughout the country. Manned by volunteers, it assists the Air Defense Command by keeping watch on the skies for aircraft. Sightings are reported by phone to the Grand Rapids Fil-

ter Center, where the information is relayed into the Air Defense System.

Although radar installations are scattered throughout the area, radar has many limitations. It is generally ineffective below 5,000 feet, and the eyes and ears of Ground Observers must fill this dangerous gap. Were enemy aircraft to attack at low altitude, the Grand Observer Corps would be the most effective available means of detecting them before they reached their targets.

POPULATION GAIN—The U. S. population is increasing at a rapid rate. By 1975 rising birth rates and declining death rates are expected to add 40 to 60 million people. This is roughly 52 million people living in the 22 states west of the National Association of Manufacturers says that for the estimated 22 million new people entering the country an investment of at least \$264 billion in plants and equipment is needed. The estimate is based on studies which show that today's average job is about \$12,000.

were entirely successful according to Commissioner Joseph A. Childs.

The trailer was built by police personnel after a need for such a vehicle was experienced at the Flint and Port Huron disasters. Barring unexpected emergencies, plans call for the official use of the trailer at the International Air Show in Detroit, July 24-25.

Principle use of the trailer is to serve as headquarters—control point for state police when they are called into an area. It provides communications between men in the field and with other areas. There are four radio transmitters and a specially designed telephone switchboard supplying five trunk and 12 extension lines. The telephone equipment, designed and built by Michigan Bell engineers, may be hooked up to regular commercial facilities or powered by local battery power.

When working under disaster or congested conditions, walkie-talkie units permit excellent communications with officers in the field.

A Jail Break Attempt is responsible for a ruling that Wayne County guards will now wear clip-on bow ties.

Four-in-hand ties worn previously proved a handy weapon for two prisoners. They grabbed two guards by the long ties, twisting them tightly around their necks.

Alarm was given in the ensuing shuffle, and other guards arrived in time to prevent serious damage.

Bridge Story
(Continued from Page 1)
ers to finance and build the structure because of the shortage of materials due to the Korean outbreak. This situation eased early in 1952 and the aforementioned powers were granted to the Authority to issue bonds to purchase \$85,000,000 worth of bonds.

While this agency was studying the request a private investment banker became interested in the project and offered to manage a group of investment dealers who would underwrite the sale of the bonds. The authority accepted the offer and while the investment group was being formed, the money market was weakening. By March of 1953 when the Authority was ready to offer its bonds for sale nobody wanted to buy them.

In order to increase their marketability the legislature passed an act during the Spring of 1953 whereby operating and maintenance cost of structure would be paid out of highway department funds. Another effort to finance with this added inducement in June of 1953 was likewise unsuccessful, but toward the end of the year the market recovered and \$38,800,000 worth of Mackinac Bridge bonds were bought by investors all over the country.

Contracts which had been awarded contingent upon this financing were immediately implemented. Merritt-Chapman & Scott Corporation's \$25,700,000 agreement to build all the foundations led to the mobilization of the largest bridge construction fleet ever assembled. The American Bridge Division of United States Steel Corporation, awarded a \$44,500,000 contract to build the superstructure, began its work of planning and assembly. In U. S. Steel's mills the various shapes, plates, bars, wire and cables of steel necessary for the superstructure and for the caissons and cofferdams of the foundation, were prepared. The bridge was officially begun amid proper ceremonies on May 7 and 8, 1954, at St. Ignace and Mackinaw City.
